You tested positive for COVID-19.

UW Medicine medical facility employees follow UW Medicine procedures.

View a list of COVID-19 symptom(s) of COVID-19 but NO known exposure to a COVID-19 positive individual.

STAY HOME.

Do not go to work and/or class, regardless of vaccination status.

GET TESTED IMMEDIATELY.

If you received a classroom or workplace notification, watch for symptoms for 14 days and activate WA Notify. If you are unsure or concerned you may have had a close contact exposure, get tested for COVID-19.

SCENARIO 1:
You tested positive for COVID-19.

Regardless of your vaccination status and regardless of whether or not you have symptoms.

STAY HOME and NOTIFY covidehc@uw.edu.

Do not go to work or class for 10 days since your last exposure or as instructed by a contact tracer.

ENTER YOUR WA NOTIFY PIN.

Your contact tracer will give you a PIN number to enter in your mobile device to confidentially alert close contacts.

COMPLETE THE ELECTRONIC SURVEY.

The COVID-19 Response and Prevention Team will send you a link to a health survey prior to Day 10.

Did your symptoms improve after 10 days of isolation?

YES

NO

END ISOLATION on Day 11 if you have no symptoms OR your symptoms have improved, AND you have not had a fever for at least 24 hours without using fever-reducing medication. It is not necessary to get tested again.

Remain in isolation and notify covidehc@uw.edu and follow instructions provided by the contact tracer.

SCENARIO 2:
You were in close contact2 with an individual who tested positive for COVID-19.

Are you fully vaccinated3?

YES

NO

STAY HOME and NOTIFY covidehc@uw.edu.

Do you have symptoms?

YES

NO

GET TESTED IMMEDIATELY.

GET TESTED 5-7 DAYS AFTER EXPOSURE.

YES

NO

You can return to work and/or class if all of the following apply to you:

1. Your symptoms are mild; and

POSITIVE

NEGATIVE

If your symptoms worsen, get tested again and contact your healthcare provider.

GET TESTED 3-5 DAYS AFTER EXPOSURE.

YES

NO

FOLLOW SCENARIO 1.

Will you have ongoing close contact (e.g., household for 14 days since your last exposure and/or getting worse, stay home, notify covidehc@uw.edu and consult a healthcare provider.

FOLLOW SCENARIO 1.

NOTIFY covidehc@uw.edu.

You do not need to stay home. You can return to work and/or class.

GET TESTED IMMEDIATELY.

YOU can return to work and/or class if your symptoms are mild; and your symptoms have improved; and you have not had a fever for at least 24 hours without using fever-reducing medication.

If your symptoms are severe or getting worse, stay home, notify covidehc@uw.edu and consult a healthcare provider.

Watch for symptoms and wear a mask around others outside of your household for 14 days since your last exposure. If you develop symptoms, follow instructions for vaccinated close contacts with symptoms in Scenario 2.

Remain in quarantine for 10 to 14 days from your last exposure and watch for symptoms. Contact covidehc@uw.edu to receive guidance if you have ongoing exposure (e.g., household member has COVID-19).

Did symptoms develop during quarantine?

YES

NO

You can return to work or class when you have completed quarantine.

Additional guidance:

- Reporting to covidehc@uw.edu or 206.616.3344 is to reach the COVID-19 Response and Prevention Team in the UW Environmental Health & Safety Department.
- Close contact means you were less than 6 feet away from an infected person for 15 minutes or more over a 24-hour period. If you received an alert from WA Notify, you potentially had a close contact exposure.
- Fully vaccinated is two weeks after the final dose of a COVID-19 vaccine.
- If you were notified of exposure by WA Notify or do not know when your exposure occurred, get tested immediately.
